

My Trip to the

Doctor

Rady Children's

I am going to see the doctor.

First we will park the car.

The big white doors will open so we can walk in.

There will be a desk with lots of colors and bright lights.

I can stand on the feet while I wait.

I can look at the fish tank while I wait.

We will check in so they know I am here.

A nurse will call my name when it is time to look at my tummy.

The room will be dark when I walk in because the machines are sleeping.

I can look at the machines while I wait to get started.

The nurse will tell me what is going to happen.

The nurse will put goeey stuff on the machine first.

The nurse will show me what it's like before it touches me.

It won't hurt when the nurse touches my tummy.

But it will feel cold because it comes out of the fridge!

The nurse will lift my shirt and touch my tummy with the cold wet stuff. It won't hurt.

After they see my tummy, I can look at the train!

I might even get a sticker for good listening during my doctor's visit.

Maybe I can visit McDonald's or the gift shop when I am done!

Soon it will be time to go home!
